## **EMOTIONAL INTELLIGENCE, THE MISSING INGREDIENT FOR LEADERSHIP SUCCESS..**

Self-awareness, awareness of others, authenticity, effective decision-making, resilience and being able to influence others' emotions are fundamental to being effective in a leadership role. Understanding who you are and how you are perceived to demonstrate emotionally intelligent behaviours, greatly enhances your ability to connect, communicate and collaborate work colleagues.

One of the most robust and consistent findings from organisational research shows there is a direct link between the way people feel and the way they perform at work. DiSCoverEI helps develop emotional intelligence competencies that increase levels of engagement, build resilience, reduce staff turnover, improve well-being, enhance productivity leading to increased profitability and market share.

"Organisations can achieve returns of up to four times higher by investing in emotional intelligence skill development. Yet only 26% of organisations are investing in emotional intelligence training to provide feedback on EI skills.."

**"Everyone goes to work with a smile on their face and returns home feeling valued and cared for."**
